AI Product: AI Product Strategy, AI Use-Case Evaluation, AI Feasibility, AI Product Lifecycle, Model Evaluation, AI Risk Management

Business: Market Research, Competitive Analysis, TAM/SAM/SOM, Business Models, ROI & Impact Analysis, Data-Informed Decision Making

Programming: Java (Core & Advanced), SQL, JavaScript, HTML, CSS

Tools: Notion, Amplitude, Figma, Git, GitHub, ChatGPT, Claude Code, Make.com, n8n, Replit

PROJECTS

Adnivio — AI-Powered SME Growth Product

- Defined product strategy and end-to-end user journeys for an AI-powered SME growth platform, translating customer pain points into product requirements and priorities.
- Designed core experiences across SME onboarding, product/service marketplace, AI advertising, analytics, wallet, and buyer–seller communication.
- Evaluated AI use cases for ad creation, content generation, campaign planning, and performance insights, balancing user value, business impact, feasibility, and responsible AI.
- Conducted market and competitive analysis covering SME pain points, TAM/SAM/SOM, monetization, and product positioning.
- Created user flows, product requirements, success metrics, prioritization frameworks, and prototypes through iterative product development.
- Developed the product prototype through the MSME portal submission stage, translating the product concept into a structured startup proposal.

Product Management Capstone — Fireflies.ai | Airtribe *RICE prioritization, PRD, Make.com, n8n automation workflows*

- Conducted product research and analyzed the gap between meeting intelligence and post-meeting execution, identifying opportunities to improve commitment ownership and follow-through.
- Designed end-to-end features including automated smart nudges, multi-tool sync, and lifecycle tracking, supported by RICE prioritization, PRD, and Make.com/n8n automation workflows.
- Engineered a product solution targeting an increase in meeting commitment resolution from **28% to 45%** (**+17** percentage points).
- Defined product requirements, user flows, success metrics, and product strategy for the proposed solution.
